![Customized Systems Technologies Inc.]

JUST THE RIGHT FIT FOR YOUR BUSINESS

Customized Systems Technologies Puts IT All Together

Meet Customized Systems Technologies

The key to establishing long-lasting, meaningful customer relationships requires personal touch and unflinching commitment. You need to take the time to get to know your customers, their business, their needs, and their industry. Customized Systems Technologies has a singular focus: to dig deep beneath the surface for all of our client interactions. We have been proud to deliver purpose-built solutions that fit the unique needs of our Chicago area customer base for over 15 years.

We Are Dedicated To:

* World-class service
* Providing agile technology solutions
* Aligning these solutions to specialty requirements
* Meeting the needs of small and large businesses alike
* Understanding and ensuring SLAs
* Matching our solutions to industry-specific requirements

Technology Solutions Built for the Present and the Future

Customized Systems Technologies doesn't focus on offering out-of-the-box IT solutions that are ready to be plugged in. We know your business needs more versatility to meet the evolving needs of your marketplace. Our approach goes outside of the lines, staying flexible so your business can be flexible today, tomorrow, and years into the future.
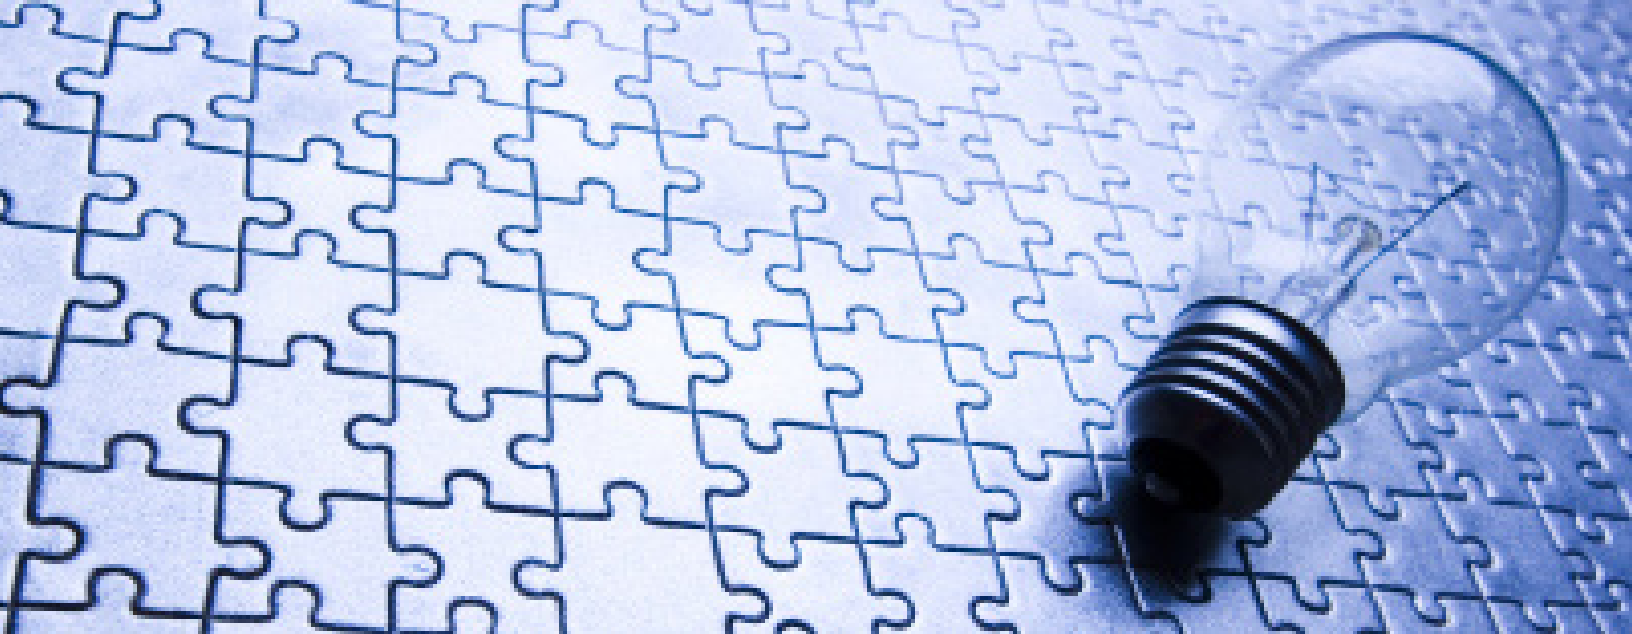

Solutions and Services include:

* Networking and Hosted Voice
* IBM Cloud
* Servers and Storage
* Data Security
* Virtualization

Networking and Hosted Voice

Voice and data is growing at a rapid pace, which strains in-house physical hardware and software components. But a hosted voice approach through the cloud enables flexible management and a low cost alternative to maintaining data on-site.

IBM Cloud

As cloud environments continue to take new shapes, the IBM Cloud can stand the test of time. It is designed for today's environments, as well as the future's. No matter how intense the workloads or network demands are, the IBM Cloud can handle IT. Customized Systems Technologies can lift your business with a cloud that is built for power and speed.

Servers and Storage

As cloud environments continue to take new shapes, the IBM Cloud can stand the test of time. It is designed for today's environments, as well as the future's. No matter how intense the workloads or network demands are, the IBM Cloud can handle IT.

Data Security

With data arriving from different sources and destinations, security can become compromised. Through our managed services, Customized Systems Technologies offers dedicated monitoring of potential security threats and vulnerabilities to keep your data safe and sound.

Virtualization

With virtualization, it's not a matter of "if" it's going to happen. It's a matter of when and how. Whether you need to virtualize servers, desktops, or storage, our team is experienced and certified to help you make the transition. In addition, by coupling our virtualization solutions with our cloud-based hosting capabilities, you can alleviate the burden of managing your own virtual infrastructure.

CUSTOMIZED SYSTEMS TECHNOLOGIES OFFERS THE UNIQUE EXPERTISE AND EXPERIENCE TO HELP YOU REALIZE THE LONG-TERM VISION OF YOUR IT INFRASTRUCTURE.
